

COMPANY PROFILE • 2026

Helping every child grow, at their own pace.

Autism assessment, ABA, speech and occupational therapy for children in Dubai — at our centre in Nad Al Hamar, or in the comfort of your own home.

**Free first
consultation**

WHO WE ARE

A plan written for your child. Never a template.

Compass Autism Care assesses and supports children with autism and developmental delay. Every programme begins with a full assessment, and what comes out of it is written for that child — their strengths, their motivation, the things their family actually needs to change.

Behaviour support, speech and occupational therapy run as one programme with one team that meets weekly, rather than three separate appointments that never speak to each other.

- ✓ **Assessment first, always**
An honest picture of where your child is today, in a report you can actually use.
- ✓ **BCBA-designed and supervised**
Programmes written by board-certified analysts and measured session by session.
- ✓ **Centre or home**
Sessions at our Nad Al Hamar centre, in your home anywhere in Dubai, or a blend of both.

7

Therapies under one programme

Dubai

Centre-based and in-home sessions

Evidence, honesty and the whole family.

Scientifically-grounded

Applied Behaviour Analysis is the most heavily researched approach to autism support there is.

Built around the family

Parent coaching is part of every programme, so strategies survive bath time and the supermarket.

Measured, not assumed

Progress data goes home with you. If the route is not working, the route changes — within weeks, not terms.

Honest about outcomes

Autism is not something to be cured, and we never promise that. We build skills that matter to your child.

Parents

of the
team

Certified Autism Specialists (CAS)

Our clinicians hold the Certified Autism Specialist credential from the International Board of Credentialing and Continuing Education Standards (IBCCES) — a certification awarded to individual professionals, requiring autism-specific training beyond the core clinical qualification and ongoing continuing education to maintain.

Everything your child needs, in one programme.

Autism Assessment & Diagnosis

A comprehensive ASD evaluation with a clear written report and a practical plan forward.

ABA Therapy

BCBA-designed, RBT-delivered one-to-one programmes with measurable goals, at the centre or at home.

Speech & Language Therapy

Expressive and receptive language, AAC and feeding support — whatever gets your child heard.

Occupational Therapy

Sensory profiles, fine and gross motor skills, self-care and sensory-friendly strategies.

Early Intervention

Intensive, play-based therapy in the golden window, blending ABA, speech and occupational therapy.

Parent Training & Coaching

BCBA-led coaching so you can manage behaviour and build communication at home.

Social Skills Groups

Small, age-matched groups building turn-taking, play and friendship through guided peer interaction.

School Readiness

Classroom routines, attending, group instructions and transition support before school starts.

Medical care too. Paediatrician home visits, immunisation, paediatric physiotherapy and lab tests are provided by our sister service, **Compass Medicare** — so a family has one route in for everything.

Why a compass?

A compass does not move the ground for you, and it does not decide where you are going. It tells you exactly where you are — and keeps pointing steadily in one direction while you walk. That is the job families ask us to do.

N

The child sets the direction

We start from who your child actually is, not from a template.

E

Evidence keeps us on course

BCBA-designed and measured. If the data says a route is not working, the route changes.

Compass

One plan,
one team

S

The family walks with us

Parent coaching is built in, so strategies survive real life.

W

Everyday life is the destination

Goals you would recognise: asking for help, joining a group, getting through a morning.

UNDER ONE PROGRAMME

Rather than sending families from clinic to clinic, the Compass Program keeps every therapy under one plan — with one team that meets weekly and one point of contact.

Assessment

Therapy

Coaching

The skills that give a family its day back.

Communication and language

From first requests to full conversations — speech, signs or a device, whatever gets your child heard.

Replacing challenging behaviour

We work out what a behaviour is asking for, then teach a safer way to ask for the same thing.

Everyday independence

Dressing, eating, sleeping, toileting — the ordinary skills that change a household.

Getting ready for school

Sitting, waiting, following a group instruction and coping with a busy Dubai classroom.

HOW IT WORKS

From first call to first session.

1

Say hello

Email us or leave your number. We ask a few questions about your child.

2

Free consultation

A clinician talks you through the options, timelines and what insurance may cover.

3

Assessment

We get to know your child and build an honest picture of where they are.

4

Therapy begins

We write the programme, agree the goals with you, then review it together.

What the first weeks look like

No referral needed

You can come to us directly, and there is no obligation after the consultation.

Most families start within a fortnight

From first contact to first session, once the assessment is done.

You see the data

Progress is measured every session and shared with you, not kept in a file.

Sometimes the honest answer after an assessment is “wait and watch”. We will tell you that rather than start a programme your child does not need.

OUR PEOPLE

A BCBA-led, multidisciplinary team.

Board-certified behaviour analysts, therapists and nurses — all licensed by the Dubai Health Authority, all verified before their first session, and members of the team additionally certified as Autism Specialists through IBCCES.

Dr Sohaib Ali
Medical Director

Dr Andoni Diaz
Family Medicine

Aoife Rafter
Board Certified Behavior
Analyst

Mostafa Shaban
Certified Autism Specialist
(CAS), CMT

Credentials held at clinician level

Behaviour programmes are designed and supervised by Board Certified Behavior Analysts (BCBA), with day-to-day sessions delivered by Registered Behavior Technicians (RBT) under their supervision. All clinical staff are licensed by the Dubai Health Authority.

OWNERSHIP

Operated by Clubtogether Hospitality.

A UAE group operating across hospitality, wellness, international medical assistance and healthcare. Compass Autism Care is owned and run by Clubtogether Hospitality.

Clubtogether

Hospitality and member experiences — helping people discover and recover.

BIA Assistance

International medical and travel assistance, wherever clients are in the world.

XLR8 Wellness

At-home IV therapy, blood testing and longevity medicine.

YOU ARE HERE

Compass Autism Care

Autism assessment and developmental therapy for children.

A track record in children's development

Clubtogether Hospitality has established several ventures dedicated to children's development in the UAE. The first was **Bloom Autism Center** in Dubai, which pioneered the group's in-home model of autism assessment and therapy and today operates as **Compass Autism Care**. That experience, and the clinical team built around it, is what the group's children's services are founded on.

One group, one standard of care — from a doctor at your door
to a child's first assessment.

Dubai

United Arab Emirates

The first step is a conversation.

Tell us what you are seeing and what is worrying you. There is no referral needed and no obligation — and sometimes the honest answer is “wait and watch”. Email us, or leave your number on the website and a coordinator will call you back.
