

COMPANY PROFILE • 2026

The clinic comes to you.

Licensed doctors, nurses, physiotherapists and phlebotomists who come to your home, hotel or office — around the clock, right across Dubai.

**Home
visits
24/7**

WHO WE ARE

Healthcare that fits around your life.

Compass Medcare takes what a clinic normally does — the examination, the bloods, the injections, the dressings, the rehabilitation — and delivers it where people actually live. A DHA-licensed clinician comes to the address, at a time that suits the household.

Most of what sends a family to a waiting room does not need one. We handle it at the kitchen table instead, and say plainly when a hospital is the right answer.

Licensed clinicians only

Every doctor, nurse and therapist holds a current DHA licence, verified before a first visit.

One coordinator, start to finish

The person who calls you back has already read your request.

Priced before we set off

You get the cost and an honest time window on the call, not at the door.

24/7

Home visits, every day of the week

40+

Services delivered at your address

DHA

Licensed doctors, nurses and therapists

Dubai

Homes, hotels and offices emirate-wide

WHY FAMILIES CHOOSE US

Unhurried, licensed and close to home.

DHA-licensed clinicians

Qualifications and background verified before anyone visits a home for the first time.

Care where life happens

Recovery holds up better in the room where it has to work — your stairs, your bathroom, your routine.

Arranged around your day

Evening and overnight visits, weekend appointments and same-day lab sampling.

Honest about the limits

If a test or a drip will not change anything, we say so. When you need a hospital, we tell you.

Same
team,
every
visit

Contact by email. We do not run a public switchboard. Families email info@compassmedcare.com or leave a number on compassmedcare.com, and a coordinator calls back — usually within fifteen minutes during the day.

Everything a household needs, at its own front door.

Doctor on Call

General practice, paediatrics, dentistry and hotel visits — examined and prescribed at home, day or night.

Nursing at Home

Elderly care, post-operative recovery, wound care, injections, catheter and tube care, newborn support.

Physiotherapy at Home

Post-surgical rehab, back and neck pain, sports injury, neuro rehab and falls prevention.

IV Therapy at Home

Nurse-administered infusions, prescribed only after a doctor's assessment.

Lab Tests at Home

A phlebotomist at your door and an accredited laboratory report, usually the same day.

Health Checkups

Full body, executive, women's and men's screening — with a real consultation on the results.

Vaccinations at Home

Childhood immunisation, seasonal flu, travel and HPV vaccines in a monitored cold chain.

And more

Teleconsultation, medicine delivery, DNA screening, medical transport and first aid training.

CORPORATE & HOSPITALITY

On-site staff vaccination, annual screening, first aid certification and 24-hour guest medical care.

Offices

Hotels

Schools

Sampled in your kitchen. Read on your phone.

Blood tests are the one part of healthcare that genuinely does not require you to go anywhere. A trained phlebotomist visits at a time you choose, an accredited laboratory runs the sample, and the report usually arrives the same day.

Crucially, a doctor then calls to explain it. A report full of numbers with nobody to interpret them is close to useless — and an abnormal result needs context before it causes unnecessary alarm.

16 individual tests

Vitamin D, thyroid, diabetes, hormones, CBC, liver, cholesterol, allergy and more.

Five checkup packages

Full body, executive, women's, men's and pre-employment screening.

Consultation included

Not an upsell — the results conversation is part of the package.

IV therapy, properly supervised

Every infusion is reviewed by a doctor first and given by a nurse who stays for the whole session.

Teleconsultation

For the questions that do not need an examination — results, repeat prescriptions, second opinions.

Medicine delivery

Dispensed by a licensed pharmacy and delivered to the door, including cold-chain items.

HOW IT WORKS

Four steps, mostly the same day.

1

Tell us what you need

Email us, or leave a number on the website with the service you are after.

2

We call you back

A coordinator confirms details and gives a clear price and an honest time window.

3

A clinician arrives

A licensed doctor, nurse or therapist comes with everything the visit needs.

4

Follow-up, not silence

A written summary, results where relevant, and a call to check how you are doing.

What to expect on the day

A realistic window

For most Dubai addresses we aim for a doctor within about an hour of confirming.

Everything brought with them

Portable diagnostics, sterile supplies and medication where prescribed.

Paperwork that works

An itemised invoice and medical report, formatted for an insurance claim.

Not an emergency service. For chest pain, breathlessness, severe bleeding, a suspected stroke or an unresponsive person, call 998 immediately.

Every stage of life, under one number.

Babies and children

Paediatrician home visits, routine immunisation, newborn and mother care, and paediatric physiotherapy.

Working adults

Same-day lab tests, executive checkups, physiotherapy for desk-shaped pain, and teleconsultation.

Older adults

Elderly care, medication management, falls prevention, catheter and tube care, and companionship.

After hospital

Post-operative nursing, wound care, IV antibiotic courses and rehabilitation at home.

Children's development. Autism assessment, ABA, speech and occupational therapy are provided by our sister service, **Compass Autism Care**. The two teams share standards and referrals, so a child is never assessed twice.

COVERAGE

We come to every part of Dubai.

From the centre out to the outlying villa communities. Arrival times vary with distance and traffic, and we give an honest window on the call rather than an optimistic one.

OWNERSHIP

Operated by Clubtogether Hospitality.

PARENT COMPANY

Clubtogether Hospitality

A UAE group operating across hospitality, wellness, international medical assistance and healthcare. Compass Medicare is owned and run by Clubtogether Hospitality.

Clubtogether

Hospitality and member experiences — helping people discover and recover.

BIA Assistance

International medical and travel assistance, wherever clients are in the world.

XLR8 Wellness

At-home IV therapy, blood testing and longevity medicine.

YOU ARE HERE

Compass Medicare

Home healthcare at your door, across Dubai.

A track record in children's development

Clubtogether Hospitality has established several ventures dedicated to children's development in the UAE. The first was **Bloom Autism Center** in Dubai, which pioneered the group's in-home model of autism assessment and therapy and today operates as **Compass Autism Care**. That experience, and the clinical team built around it, is what the group's children's services are founded on.

One group, one standard of care — from a doctor at your door
to a child's first assessment.
